Email:

How did you hear about the ADI-R training course?

How will you be using the ADI-R?

Specify your experience in conducting assessments with typically developing (i.e., non-ASD) children and their families:

Specify your experience in conducting assessments with children who have an ASD and their families:

What (if any) assessment tools have you been using to conduct diagnostic assessments for Autism and other neurodevelopmental disorders until now?

Please tick one of the following options:

I have no previous experience in administering and coding the ADI-R for diagnostic assessments

I have some previous experience in administering and coding the ADI-R for diagnostic assessments

STATEMENT OF CONSENT

I, _____ have read (or where appropriate, have had read to me) and understand the information outlined in the letter above, and any questions I have asked have been answered to my satisfaction. I wish to confirm my request for a place in the ADI-R training course. I agree with the conditions outlined in the letter above regarding payment and pre-course preparation.

Full name: _____

(block letters)

Signature: _____ **Date:** _____

Trainer's Name: **DR ANNE CHALFANT** _____

(block letters)

Trainer's Signature:  **Date: 8.2.2018**

NB: If you are vegetarian or have food allergies, please note this here:

(Please note we *cannot* cater for a Vegan or egg free diet)

Please send your application and consent form to:

Dr Anne Chalfant

E-mail: info@anniescentre.com

Important Information (NB: please retain for your preparation for the course):

The ADI-R is a tool for clinicians wishing to achieve specialist skills in the assessment and diagnosis of Autism and related neurodevelopmental difficulties. Consequently, the ADI-R training course is an *intensive* course that requires work to be completed both *pre-course* and *post-course*. It is important that you allow yourself enough time to complete the pre-course work before attending the course. To ensure that you are appropriately prepared, please follow these steps if you receive confirmation of your place in the training course:

- **Step 1:** If you do not have access to an ADIR manual, protocols and algorithms, then please order them from either Western Psychological Services (WPS; www.wpspublish.com) or ACER (<https://shop.acer.edu.au>). The kit normally arrives within 7-10 working days of your order. If you order from WPS, then you might need to pay a customs duty in order to have materials delivered to you. Included in the kit will be the ADI-R (you can also purchase the manual separately). It is *essential* that you bring your manual with you to the training course. You do not need to bring other assessment materials to the training course, only the manual. **There will not be spare manuals to share at the course.** You will find it particularly useful to have your own manual in order to make notes about coding and administration. Please read the manual *before* attending the course.
- **Step 2:** Conduct a practice ADI-R administration. The purpose of the pre-course administration is to help you become more familiar with the ADI-R before attending the course. I will look at your administration tapes and give you feedback during the course. It is useful to conduct your administrations with parents of children who already have a formal diagnosis of Autism. In the worst-case scenario, you can complete your pre-course administrations by administering the ADI-R to a colleague or other adult. If you do not have time to complete this step before the course, then you can complete it after attending training.
- **Step 3:** Watch the video of the administration that I send to you. You do not need to code the video. However, in order to familiarise yourself with the ADI-R coding system, it will be useful to read through the codes assigned immediately after you watch the video.

The pre-course work typically takes approximately 6 hours to complete. This does not include the time you will need to order ADI-R materials and find volunteer adults with whom to practice the ADI-R administration.

For further information on the ADI-R you can access the WPS website which also includes FAQ's and other relevant information or the website for Weill Cornell Medical College, Centre for Autism and the Developing Brain.

<http://www.cornellpsychiatry.org/education/autism.html>.

Spaces will be limited to a maximum of 15 people and allocated on a “first in best dressed” basis based on full payment.

Venue: Macquarie University Graduate School of Management (MGSM) Conference Centre, 99 Talavera Road, Macquarie Park, NSW.
